MULTILAYER GOLF BALL WITH A THIN

THERMOSET OUTER LAYER

## RESPONSE TO OFFICE ACTION

RECEIVED

MAY 2 1 2002

TC 1700

Commissioner for Patents Washington, D.C. 20231

Sir:

In response to the office action mailed December 19, 2001, Applicants submit the following amendments and remarks for entry and consideration during the examination of the above-identified application.

## IN THE CLAIMS

A marked up version of the revised claims, showing insertions and deletions, is included in Appendix A. Please amend the claims as follows:

46. (Amended) A method of forming a golf ball comprising the steps of: forming a core comprising:

a solid center made from a first rubber based material;

a solid outer layer made from a second rubber based material having different physical properties from said first rubber based material;

forming an inner cover layer made from a material having a first shore D hardness from about 65 to about 74 shore D and having an outer diameter of at least 1.6 inches;

casting an outer cover layer made from a material having a second shore D hardness less than the first shore D hardness of the material of the inner cover layer.
